Screenshot depends on display resolution, the higher the display resolution, the better the screenshot. To get a screenshot with high resolution, go to your control panel and check your display settings. Increase the display resolution if it is set to a lower resolution and that will solve your problem.

How to Increase the Resolution of an Existing Image With ...

Increase resolution One of the challenges of working with social media content is that not all images are professionally shot on a camera. Brands and businesses also want to tap into user-generated content shot by everyday people like you and me, and we were finding that this meant the end use for those images was restricted because they were a bit small.

How to take High Resolution screenshots in Windows 10

We are often asked 'what resolution do my images need to be?'. In the world of small format printing, the answer to this question is usually pretty easy: the rule of thumb is usually twice the output linescreen, or about 300-400dpi.

Increase Resolution Print Screen - thepopculturecompany.com

Open Screen Resolution by clicking the Start button , clicking Control Panel, and then, under Appearance and Personalization, clicking Adjust screen resolution. Click the drop-down list next to Resolution, move the slider to the resolution you want, and then click Apply.
