Because SharePoint Server often runs in environments in which databases are managed by separate SQL Server database administrators, this document is intended for joint use by SharePoint Server farm implementers and SQL Server database administrators. It assumes significant understanding of both SharePoint Server and SQL Server. This article assumes that you are familiar with the concepts that

ASP.NET - CodeProject

Connect MongoDB and the app server using the Node.js driver. There are two popular MongoDB drivers that Node.js developers use: the official Node.js driver and an object document mapper called Mongoose that wraps the Node.js driver (similar to a SQL ORM). Both have their advantages, but for this example we will use the official Node.js driver.
